FOR VOLVO CARS MANUFACTURING – INSTRUCTION FOR V11 DGS

October 2023

Dangerous goods packaging for products with possible projection hazard  
Certificate NET8505A

The following instructions are valid for the V11 Quickbox DGS used for overseas shipping where it is mandatory to use according to the VOLVO CARS PACKAGING REQUIREMENT.

Maximum unit load per Quickbox is 15 kg.

## Mandatory:

- To use EMB153 for pallet label.
- The correct pallet V8 Art.No 2075027  
(No other pallet is allowed to use!)
- Always fill up with a full layer of boxes to make a complete layer. If necessary fill up with empty boxes.
- Maximum layers of boxes are 4 on each pallet.
- Use top lid and two straps as shown in the instruction.
- Do not use stretch film, use 2 straps on the longside only.

If you need additional support please contact us.

## V11

Dangerous goods packaging for products without or with small projection hazard

Packaging with DESAB® cage suitable for products with risk for projection/movement outside a radius of 4 meters when activated by heat or electrically activated.

Example: Piston hood lifters/ Side-, Driver-, Passenger- or inflatable curtain airbag modules or other pyrotechnic safety devices with high hazards risk when activated in unpackaged condition.

To use and mark this packaging for dangerous goods UN3268, SAFETY DEVICES, division 9, it is required to perform a successful UN Test Series 6(c) bonfire test with the product as offered for transport.
